1972, or an FAA-approved equivalent. Where an inspection required by this paragraph coincides with an inspection interval specified in paragraph (b)(1) of this AD, the inspection conducted in accordance with this paragraph is considered as showing compliance with that required by paragraph (b)(1) of this AD.

(3) If cracks are found as a result of the inspections conducted in accordance with paragraphs (b)(1) or (b)(2) of this AD, before further flight, replace the cracked parts with new parts of the same part number. Where new torque tubes are installed as a result of the inspections specified in paragraphs (b)(1) and (b)(2) of this AD, the repetitive inspections required by paragraphs (b)(1) and (b)(2) must be initiated upon accumulating 28,000 landings on the new torque tubes.

(4) Torque tubes fitted to torque shaft assemblies for which the total landings cannot be determined, must use in lieu thereof the total landings of the aircraft on which they are installed for the purpose of complying with paragraph (b)(1) of this AD.

NOTE: If total landings of the aircraft are not known, an operator may substitute a value for total landings established by dividing the total aircraft hours by the average flight length for the particular aircraft, subject to the approval of the assigned FAA Inspector.

This amendment becomes effective on January 14, 1976.

Issued in Washington, D.C., on December 8, 1975.

J. A. FERRARESE,
Acting Director,
Flight Standards Service.
