From the Protestants.

(1) Give the diversion of traffic from other carriers or modes, expressed in rail carloads.

(2) Identify the specific line(s) or routes of the system to lose traffic as well as the amount of traffic to be diverted from the segment expressed in carloads and trains, if applicable. Identify if abandonment of any line is anticipated as a result of the merger-related diversion.

(3) Identify the line segment(s) of the merged system to receive the traffic diverted from the protestant, as well as the number of cars to be added to the segment by diversion from the protestant.

(4) Indicate the net change in ton-miles moved from origin to destination as a result of diversion of traffic from protestant's line. The net change in ton-miles should be used as the basis for calculating the change in fuel consumption.

(5) Identify the net change in train-miles over the protestant's system as result of diversion.

(6) Identify the merger-induced changes in employment in the protestant's system, broken down by specific location.

(7) Identify the conditions which have been requested by the protestant to mitigate adverse impacts of the merger.

From the Trackage Rights Applicants

(1) In addition to environmental information normally submitted with such applications, data should be submitted on the possibility of abandonment occurring as a result of granting the trackage rights following procedures outlined in the Section of Energy and Environment's manual.

This data should be submitted no later than the time of filing of the applications or protests. For future applications and the initial application on file, parties should indicate where the data is located in the application.

All interested agencies, organizations, or persons are invited to participate in the scoping process as defined by current CEQ Regulations. Comments may be submitted on the above-described environmental issues and other areas of potential concern.

The environmental analysis contained in the EIS will be considered as an integral component of the agency's decisionmaking process. Upon completion of the draft EIS, its availability will be announced in the **Federal Register** at which time public comments will be solicited.

The Commission's contact person for this action is Ms. Judith L. Troast, Branch Chief, Section of Energy and Environment, Rm. 3387, Interstate Commerce Commission, 12th and Constitution Ave., NW, Washington, DC 20423 (telephone 202–275–7220).

Part II

Department of Labor

Employment Standards Administration

Minimum Wages For Federal and Federally Assisted Construction

DEPARTMENT OF LABOR

Employment Standards Administration

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General Wage Determination Decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed in construction activity of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General Wage Determination Decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

Modifications and Supersedeas Decisions to General Wage Determination Decisions

Modifications and Supersedeas Decisions to General Wage Determination Decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the modifications and supersedeas decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing general wage determination decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and supersedeas decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Office of Government Contract Wage Standards, Division of Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rulemaking procedures prescribed in 5 U.S.C. 553 has been set forth in the original general wage determination decision.
